Natural Hardwood Charcoal

Our Natural hardwood lump lights quickly and gives consistent high heat and longevity. The character of this wood species results in a more heavy-duty charcoal after carbonisation, this means a higher heat output, as well as provides a lower level of ash, little smoke and no sparking during your cooking experience.

Ingredients:	Singular Source Hardwood (Fruit)
Burning Time:	up to 4 Hours
Size:	5cm and up
Packaging:	5kg 3ply Kraft Bag w/plastic inner lining 12kg PP Bag w/plastic inner lining 20kg BOPP Bag (Dust & Waterproof)

BBQ Hardwood/Sawdust Briquette

Due to the longer burn time of the briquettes, these are often great for open based applications such as rotisseries or general grilling which will give up to 5-6 hours of cook time

Ingredients: Hardwood /Sawdust Mix
Burning Time: 5-6 + Hours
Size: 4.5 x 10-20cm
Packaging: 5kg /10Kg Carton Box

BBQ Briquette – Pillow Shape

All-natural material used in the manufacturing, no accelerants therefore no nasty smells make this a very clean burning product. Burn test have been extremely successful with the product exceeding max measuring parameters on the infrared Thermometers used to measure heat output.

Ingredients: Hardwood /Sawdust Mix
Burning Time: 4 + Hours
Packaging: 5kg/10kg Carton Box

Binchotan White Charcoal

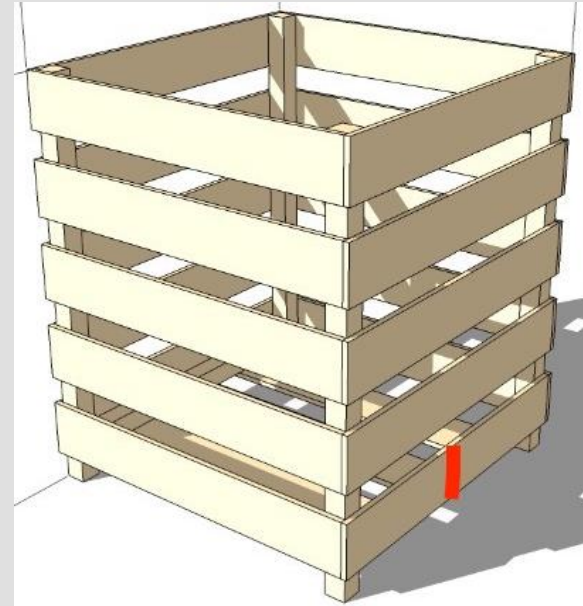

This high quality BINCHOTAN Charcoal commonly used on Hibachi for high-end restaurants. The best Yakitori restaurants use Binchotan as fuel.

- 100% Natural, No Chemicals added
- Extremely Dense
- Long lasting, up to 9 hrs.
- High, consistent heat
- Low Ash, No Smoke, No Spark
- Can be reused after extinguishing.

Ingredients:	Hardwood
